

CSS Tasks(Flexbox & Grid)

(07-07-2025 – 08-07-2025)

♦ Task 1: Desktop Navigation Bar with Flexbox

Objective: Create a horizontal navigation bar using Flexbox.

Requirements:

- Use div and a tags to build the structure.
- Apply display: flex and justify-content: space-evenly.
- Add padding, background color, and link styling.
- Align all items in a single row across the top.

Example Output:

♦ Task 2: Pricing Plan Section with Grid

Objective: Create a 3-column pricing layout using CSS Grid.

Requirements:

- Use a div container with three child divs (cards).
- Apply display: grid with grid-template-columns: repeat(3, 1fr).
- Style cards with padding, border, and background color.
- Add spacing between cards using the gap property.

Example Output:

CSS Tasks(Flexbox & Grid)

(07-07-2025 – 08-07-2025)

♦ Task 3: Product Grid with Highlighted Feature

Objective: Build a 4-column grid layout with one item spanning two columns.

Requirements:

- Use CSS Grid with grid-template-columns: repeat(4, 1fr).
- The first item should span across 2 columns using grid-column.
- Add equal height, padding, and centered text.
- Use div tags for each item and apply background colors.

Example Output:

♦ Task 4: Centered Login Form with Flexbox

Objective: Design a login form that is perfectly centered on the screen.

Requirements:

- Use div, input, and button tags for structure.
- Apply display: flex, justify-content: center, and align-items: center to the container.
- Style the form with border, padding, and box shadow.
- Include inputs for username and password, and a submit button.

Example Output:

(07-07-2025 – 08-07-2025)

♦ Task 5: Wrapping Card Layout Using Flexbox

Objective: Create a row of cards that wrap onto the next line when space runs out.

Requirements:

- Use a parent container with display: flex and flex-wrap: wrap.
- Each card should have a fixed width and consistent padding.
- Add gap between cards and center-align text.
- Use div tags for cards and apply box model styling.

Example Output:
